

# GREEN PLASMA FOR GREEN FUTURE

OCT 12 • 10:00 AM CEST

JOIN US FOR A DISCUSSION ON PLASMA TREATMENT OF  
SEEDS!

-----  
Where are the issues?

What are advantages of plasma treatment?

What are drawbacks of this technology for use in practice?

## PROGRAM

COST Virtual Mobility scheme (Dr. Augusto Stancampiano, VNS Manager)

Introduction - overview of the problems and issues faced before/ during/ after experimental work (Dr. Nina Recek)

Variety of plasma devices (home-made devices): Issues arising from comparing the experimental data and incomparability of experimental results (Assoc. prof. Dr. Gregor Primc)

Plasma decontamination of seeds: comparison between evaluation techniques for decontamination (Jure Mravlje, Ph.D. student).

Protocols for plasma treatment of seeds (Pia Starič, Ph.D. student)

Upscaling of plasma systems in industry and continuous production line (Dr. Peter Gselman, CEO of INTERKORN Ltd., expert from industry)
